Circular #5, Nursery - Class 4

Dear Parents/Guardians,

Both measles and rubella are major public health concerns in the country. In India, more than 1.3 million children acquire measles infection and around 49,000 infected children die each year. Rubella infection in pregnant women may cause fetal death or congenital defects; it leads to the development of birth defects in almost 40,000 children annually in the country.

The State Government is conducting a **Measles and Rubella (MR) Vaccination Campaign** as part of the national strategy to eradicate measles and control rubella. The MR campaign is conducted to increase the immunity level of the entire community. The Department of Health and Education is partnering with our school to participate in the MR campaign. It will be conducted on **Tuesday, July 30**. The vaccine is absolutely safe (it is WHO approved), and has no side effects. All the children from 9 months to 15 years (up to class 10) will be immunized.

We hope you understand the significance of this vaccination and give your consent for it. The vaccination is free and will be injected by a trained team of doctors from the Civil Hospital, Udaipur in the school premises.

Please send the consent form below to the class teacher by **Wednesday, July 17**.

Regards,

Durriya Zari
Headmistress

MEASLES-RUBELLA VACCINATION CONSENT FORM

YES ☐, I have read and understood the attached vaccine information, and I DO consent for my child to receive the MR vaccination.

NO ☐, I DO NOT consent to my child receiving the MR vaccination.

If NO, please give reason(s) below:

Name of the Child: _____

Class and Section: _____

Parent's/Guardians' Signature: _____

Date: _____

Mobile No.: _____
